The smart home tech at this year's Mobile World Congress 2019 was all about voice-activated automation hubs and connected appliances.

We currently rank as the largest provider of intelligent home solutions in Asia. Consumers consistently choose VVA solution for its elegant industrial design, high quality and cost efficiency. The solutions can be deployed as a simple kit of devices, for example a light switch and lamp plug, or a full suite of products enabling automation of the entire home, including sensors, intelligent controllers, software apps, and central server data services. Our awesome team have developed a powerful yet easy to use mobile phone app and advanced data analysis platform. while enlarging our product category from 4 to 15 devices. At present, VVA solutions satisfy demands in intelligent security and lighting, air-conditioning and are already among the best in Vietnam intelligent home furnishing market.

Technology at work for you

CONNECTING YOUR HOME TO YOUR HAND

A Smart Home is equipped with sensors that enable devices to be controlled remotely and digitally. Lights, doors, windows, televisions, coffee pots, and anything else can be digitalized with sensors to make it remotely accessible or automated.

The smart home will still be a work in progress. You may have automated entry access, your door working in congruence with an app or sensor. Your lights may be voice-controlled.

OUR SOLUTIONs

Smart Guard

Safety Life

Lovely PET

Cinema to your home

Smart Office

Energy management

flexible solutions for your home sweet home

Smart Guard

Fully functioning control room with CCTV Monitoring fully linked to mobile. Mobile are tracked 24 hours per day enabling the controller

24 hours short notice requests via telephone, text or email (all monitored 24 hours per day)..

Safety Life

Home security solutions enable residents to closely monitor each room in their household. Sensors and alarms spread throughout the building detect any and all changes in the house's condition, from motion development to the opening and closing of doors and windows. If the smart home system detects undesirable changes, it instantly notifies the user of the situation.

Energy management

Control every aspect of your house from wherever you are, using your smartphone, tablet, PC, touch screen, remote or keypad. Control your Thermostat, Lighting and Smart home devices, with easy-to-use interfaces that ensures that controlling your home will be effortless, despite the complexity that goes on behind the scenes.

These applicable solutions include: security, home health, entertainment, and home automation, which idyllically promotes a safer, happier, and more comfortable and convenient lifestyle. The solution will help operators to transform from traditional home broadband services to provide intelligent home services and increase subsequent service income revenues.

PROVIDES A TOTAL END TO END SOLUTION.

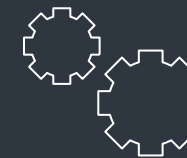

Cinema to your home

We can provide you with single room systems that change your living area into a new high tech space for all the family to enjoy. We can take over your full house project and provide you with multi-room audio in each area, interlinked high definition TV's with all your favourite

programs, smart lighting & heating controls that are preset and controlled via the Internet ready for your return home. We install new state of the art security systems that are fully operated from your mobile phone and all this can be activated from the push of a single button.
